These birds nest on the open beach from February-August.

These birds nest on the open beach from February-August.

Every time a person or dog gets too close, the parent birds leave the nest, exposing the eggs and young to predators and harsh weather.

Every time a person or dog gets too close, the parent birds leave the nest, exposing the eggs and young to predators and harsh weather.

Because they are so well camouflaged, it is easy to accidentally step on them.

Because they are so well camouflaged, it is easy to accidentally step on them.

What Can You Do?

- Avoid walking on the upper beach, staying close to the water.
- Never drive on the beach during the nesting season.
- Keep pets off the beach.
- Respect posted areas.
